

# ULTIMATE REPAIR

## CONSULTATION GUIDE

### 1. ANALYZE THE DAMAGE LEVEL

#### BREAKAGE

Pull strands between your fingers. Damaged hair is brittle and breaks easily. When wet it can stretch excessively without returning to its original shape.

#### MOVEMENT

Shake the hair and watch the mid-lengths and ends. Damaged hair falls without a bounce, looks stiff and can be more difficult to detangle.

#### ELASTICITY

Flip the ends to see how stiff they are. Damaged hair is lacking smoothness and flexibility.

### 2. PERSONALIZE THE RITUAL

#### ALL HAIR TYPES

Hair texture guides the amount of product. Damage level guides the time.

#### LIGHTLY DAMAGED

#### HEAVILY DAMAGED

#### CLEANSE

Lather and rinse to cleanse the hair.

#### CONDITION

30 seconds

3 minutes

**PROTIP:** With conditioner on the hair, wrap a warm towel around the head. This nice treat will soften the cuticle and boost product penetration.

#### TREAT

Apply liberally, beginning in the most damaged areas.

### 3. ADVISE FOR AT-HOME

Your client should continue to use the routine at home with **Miracle Hair Rescue** every third wash or more often on highly damaged hair.

1ST WASH

2ND WASH

3RD WASH

4TH WASH
